ECOLABEL  
Certified product

Lucart Professional is the natural expression of the fundamental values of Lucart Group: continuous innovation, overall product quality, respect for the environment and total client orientation.

A reality that is solid and dynamic and which is dedicated to the Away-from-Home market with global solutions, meeting today's needs and anticipating future demands.

An integrated range of tissue and airlaid products and dispensing systems which define new standards of efficiency and environmental sustainability.

LUCART PROFESSIONAL.  
A NEW ERA HAS BEGUN.

The experience and results of Lucart Group in the professional market are reflected in a new reality: Lucart Professional.

A new brand which consolidates all the lines of the division.

A choice that strengthens its market value on an international level.

## Quality protecting the environment. The new logo.

A stylised paper roll, representing the spirit of the Company production, along with the drawing of a leaf has been added to the design as a synthesis of Lucart Group's ecological mission.

The new lettering, which communicates reliability and modernity, strengthens the drive for innovation. This union has created a logo which highlights all the value of Lucart Professional.

# One brand for all lines.

As of today, all lines will lead towards one brand.

A wide range of products called Lucart Professional - in order to meet all requirements of the professional world.

## ECONATURAL

### The future of sustainability.

EcoNatural is an innovative line in Fiberpack®, the raw material obtained from recycled cellulose fibres, which are present in beverage cartons.

A range of high quality products and of exceptional performance, characterised by the light brown colour, derived from the use of unbleached cellulose fibres.

All products in the EcoNatural line are certified Ecolabel.

## AIRTECH

### The technology which is at the service of the product.

AirTech is the line produced with the exclusive airlaid technology, which uses air in the manufacturing process of the pure cellulose fibres.

The products therefore develop extraordinary characteristics of absorbance and strength creating an unequalled performance.

EU Ecolabel: IT/04/001

Ecolabel is the ecological quality label that guarantees the respect of severe criteria for the protection of the environment required at an European level: low water and air pollution, low greenhouse gas emissions and electricity use.

LUCART  
PROFESSIONAL

## STRONG

### The strength of pure cellulose.

Strong is the full line of products made from 100% virgin cellulose fibres, in compliance with the environmental sustainability criteria foreseen by the PEFC forest certification.

The solution which combines high performance results and excellent quality.

## ECO

### The respect for nature.

Eco is the line made from 100% recycled and regenerated fibres.

A wide range of products combining quality and respect for the environment, to satisfy all needs.

All products in the Eco line are certified Ecolabel.

## EASY

### The basic line.

Easy is the new name of the basic line made with 100% recycled fibres.

It's the complete solution which represents the perfect balance between quality and excellent value for money.

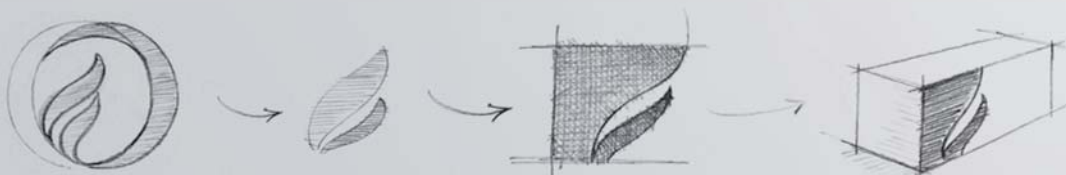

PEFC is the forest certification that guarantees the correct environmental management of forests from which cellulose comes.

## The new identity pack.

The new graphics have been designed to offer the immediate decryption of all information and to enhance the quality of the product.

It is distinguished by the presence of a clear graphic symbol which leads towards the logo, giving the whole range a strong and distinctive personality.

## The advantages for our partners.

The adoption of Lucart Professional brand as the unique signature for all lines will bring tangible benefits:

- maximum recognition and memorability of the brand;
- increase the overall perceived quality of the products;
- improve the efficiency in the communication and sales process.

The change in the sign of continuity whereby the range and product codes remain as they were.

# LUCART PROFESSIONAL PROJECTS

INNOVATION BECOMES A PRODUCT.

The constant research and development process has brought Lucart Professional to offer their customers an extended range of products and dispensing systems to choose from.

A complete assortment designed to meet all the Away-from-Home needs, transforming technological solutions into innovative products.

The cutting-edge solutions combine the highest levels of performance, hygiene and sustainability.

# ECONATURAL

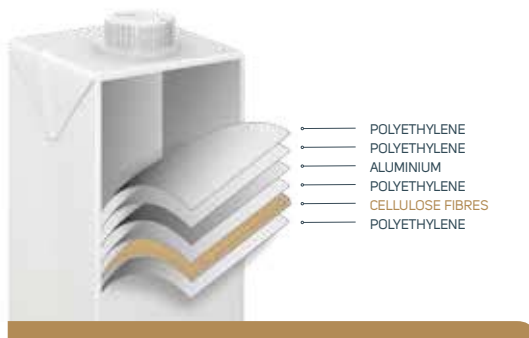

## The future of sustainability.

### ECO TECHNOLOGY THE EVOLUTION OF ECOLOGICAL PAPER

EcoNatural is a line of products made from Fiberpack®, the raw material obtained from recycled cellulose fibres present in beverage cartons. Fiberpack® is an environmental and technological break-through which comes from a collaboration between Lucart Group and Tetra Pak®.

In addition to cellulose fibres, beverage cartons contain polyethylene and aluminium: thanks to Lucart Group's exclusive technology, these materials are not discarded, instead re-used in other manufacturing activities.

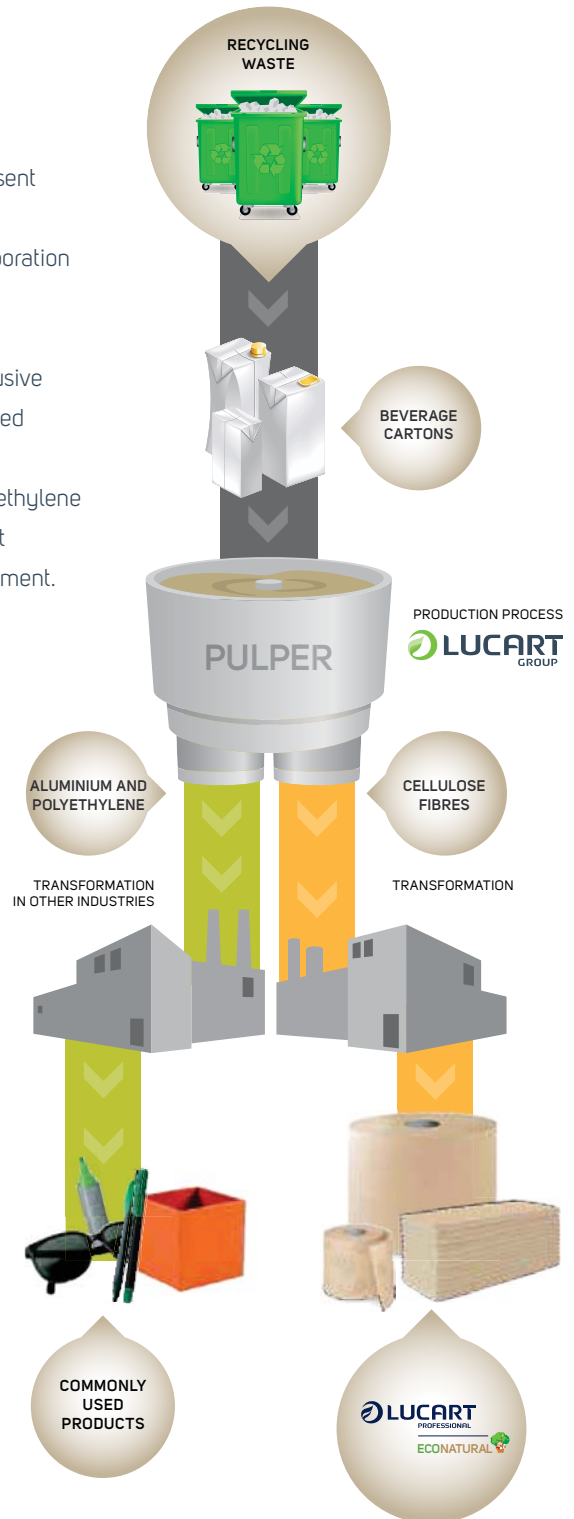

The production process separates cellulose fibres from polyethylene and aluminium, through physical-mechanical action without the use of harmful substances for both man and the environment.

A beverage carton is, on average, made from 74% cellulose fibres, 22% polyethylene and 4% aluminium.

### ECO QUALITY A SUPERIOR PERFORMANCE

An exceptional performance paper is made from the Fiberpack® innovative production process. The cellulose fibres present in beverage cartons are of a quality comparable with virgin cellulose and therefore able to provide the finished products with excellent strength and absorbance.

A NEW LIFE FOR BEVERAGE CARTONS

**ECO SUSTAINABILITY**  
**THE RESPECT FOR THE ENVIRONMENT**

EcoNatural products positively help the environment:

- by giving life to materials which otherwise would be lost in waste;
- by contributing to the reduction of CO<sub>2</sub> emissions in the atmosphere;
- by preventing the cutting of trees.

Considering the tonnes of post-consumer beverage cartons purchased to produce the EcoNatural project, in 2013 Lucart Group helped to:

✓

**Recover**  
808 million  
beverage cartons\*

✓

**Prevent**  
the formation of  
55 500 m<sup>3</sup> of waste\*\*

✓

**Save**  
133 375 averaged  
sized trees\*\*\*

✓

**Avoid**  
23 328 tonnes  
of CO<sub>2</sub> emissions\*\*\*\*

Lucart Professional has developed **The Environmental Saving Calculator**, an innovative tool which allows us to effectively evaluate the ecological contribution of every purchase of EcoNatural products.

Once the EcoNatural products have been inserted into the calculator, the system generates a certification as proof of the ecological contribution in choosing EcoNatural products.

# AIRTECH

The airlaid which enhances the performance.

## ▶ AN EXCELLENT QUALITY

AirTech is the airlaid paper line with exceptional performances.

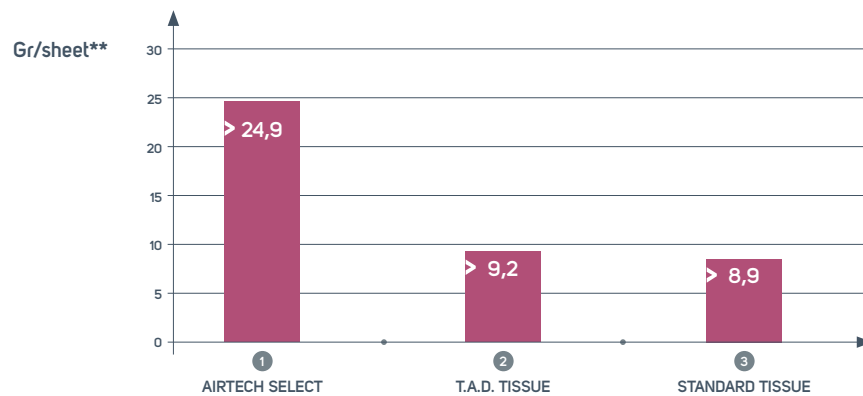

The exclusive airlaid technology, using air instead of water in the production process of pure cellulose fibres, together with the special three dimensional weave, provide the AirTech products with an extraordinary absorbance capacity and strength, even when wet.

The range of products is suitable for contact with food products and is dermatologically tested.

### Absorbance

Comparison of AirTech versus T.A.D. Tissue and standard Tissue.\*

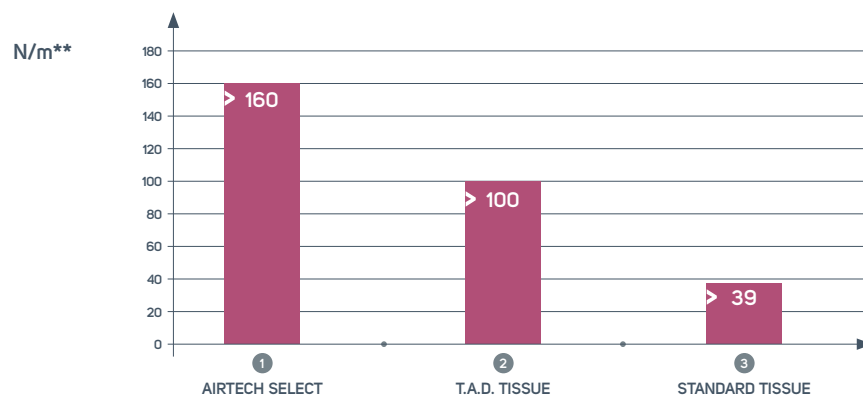

\* Analysis carried out by comparing an equal size sheet of AirTech Select, T.A.D. Tissue and standard Tissue (average grammage).  
\*\* Grams of water absorbed per sheet.

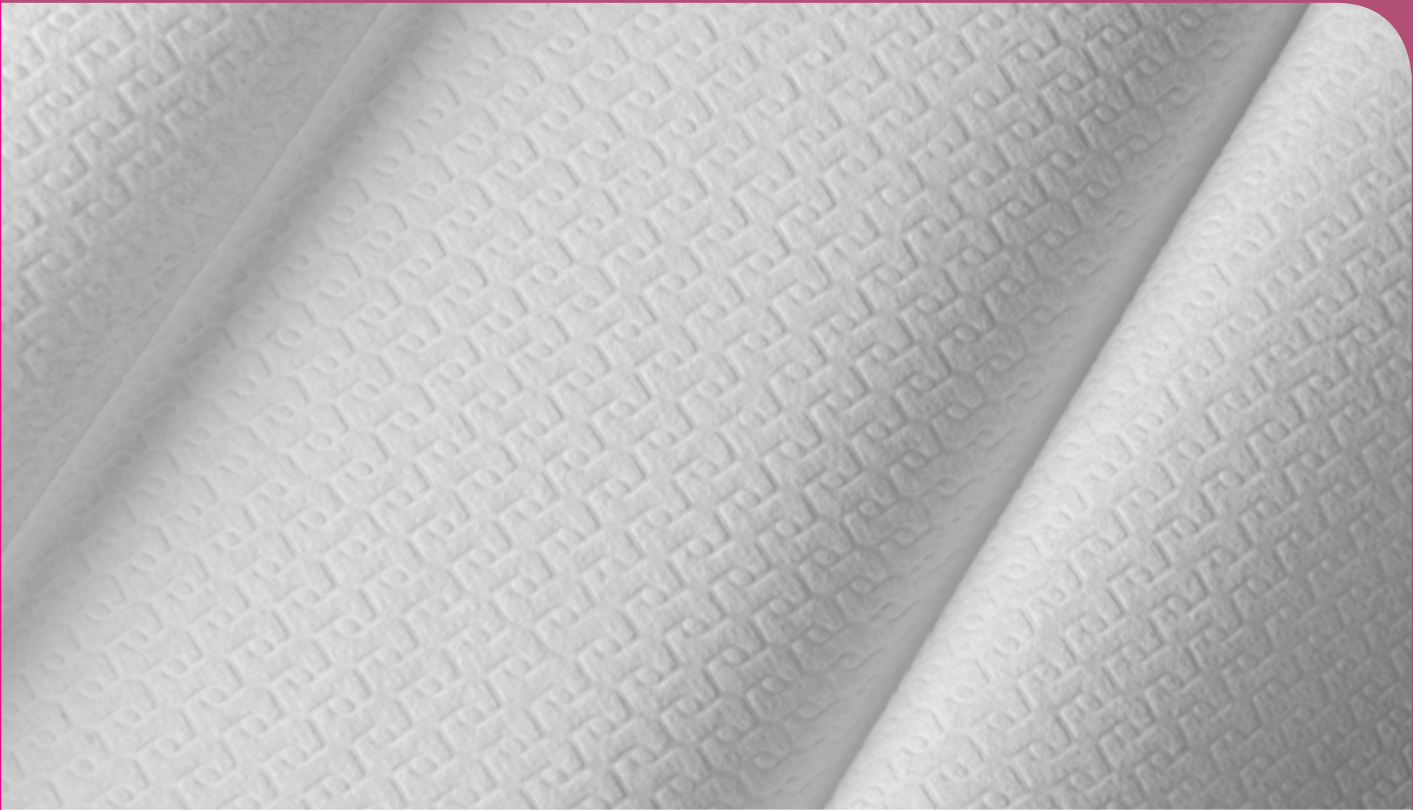

### Wet resistance

Comparison of AirTech versus T.A.D. Tissue and standard Tissue.\*

\* Analysis carried out by comparing an equal size sheet of AirTech Select, T.A.D. Tissue and standard Tissue (average grammage).  
\*\* Measurement of strength required to tear a wet sheet.

➤ **AN UNBEATABLE VERSATILITY**

The AirTech products have the same consistency and strength of a cloth, the versatility and the hygiene of paper, the practicality and absorbency of a sponge.

➤ **AN IDEAL GRAMMAGE WEIGHT FOR EVERY AREA**

The AirTech products are made with different grammage weights in order to ensure maximum performance for the consumer:

- AirTech Power is ideal for heavy workloads where excellent absorbency and strength are required;
- AirTech Select is recommended for all jobs which require a high performance;
- AirTech (50 gr/m<sup>2</sup>) is suggested for general use.

## MULTI-PURPOSE CLOTHES

## HYGENIUS

The intelligent system  
for an efficient washroom.

▶ **MAXIMUM HYGIENE**

To reduce the risk of bacterial contamination

It is important to ensure hygiene and safety in high traffic areas.  
The Hygenius line is the ideal solution to be used in the washrooms  
where there is a major risk of bacterial contamination.

▶ **COST CONTROL**

Thanks to no-waste dispensing

The Hygenius dispensers and refills have been studied and developed  
simultaneously, in order to ensure maximum performance and minimum  
wastage. Each dispenser has been designed to provide just the needed quantity.

 **HYGENIUS**<sup>®</sup>

## >> DISPENSERS <<

# L-ONE

## The single sheet dispensing systems. Solutions for all work areas.

The L-ONE line combines the advantage of the single sheet dispensing system with the quality of Lucart Professional products.

The L-ONE systems guarantee hygiene and consumption reduction compared to traditional systems.

The dispensers are linear, free from sharp edges and suitable for all types of environments, thanks to its modern design.

- L-ONE MINI, the solution for washroom and kitchen areas.
- L-ONE MAXI, the answer to the workplace area.
- L-ONE TABLE, TABLETOP and COUNTER, systems for the food area.

### ► L-ONE MINI

Lucart Professional L-ONE MINI dispenser is a versatile and high performing system designed to provide toilet paper as well as kitchen wipers.

#### Washroom area

The single sheet dispensing system optimises paper consumption.

L-ONE MINI guarantees the maximum hygiene as users touch the required sheet only.

#### Food preparation area

The system, dispensing Strong blue paper, is ideal for using in the food preparation area as the blue colour is easily visible and identifiable in food preparation.

The single-sheet dispensing system ensures minimal waste, using just one single hand.

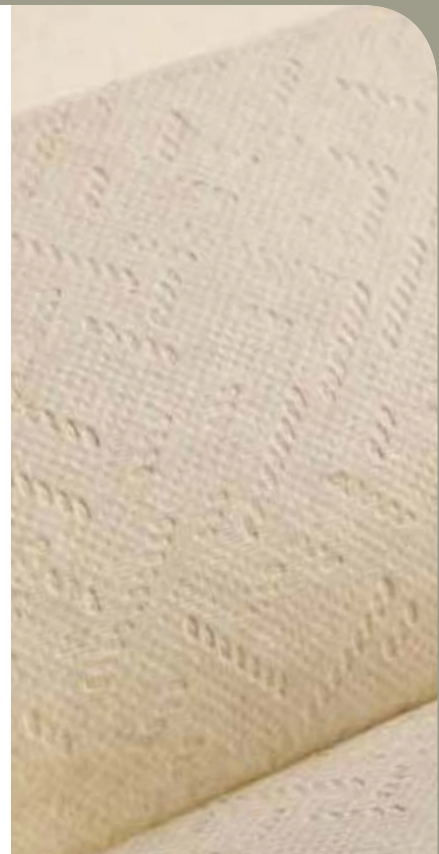

### ▶ L-ONE MAXI

The Lucart Professional L-ONE MAXI dispenser offers multipurpose wipers with an internal extraction system.

It is ideal for medium to large surface areas such as industrial/professional kitchens, mechanical repair garages and any other industrial environment.

The single sheet dispensing system assures the consumption control of paper by offering contact with only the individual sheet used.

## ▶ TABLETOP AND COUNTER

The dispensers have a high autonomy ideal for public places with large crowds.

- High capacity levels.
- Ideal for canteens, self service restaurants with large crowds.
- Simple consumption control thanks to the transparent design.
- Advertisements may be placed on the front of the dispenser.
- The dispenser may also be fixed to the wall in rooms of a limited size.

## ▶ L-ONE TABLE

The perfect solution for dispensing napkins in small spaces.

- Perfect to place on bar counters, tables, in pubs or fast food outlets.
- Practical and always available to the customer.
- Ideal for fast consumption in rooms with limited space.

## >> DISPENSER <<

LUCART PROFESSIONAL

## Lucart Professional No Clog. **NO CLOG.** **NO PROBLEM.**

- **PROBLEM**  
Sometimes the used paper, instead of being thrown into the bin, ends up in the toilet and therefore risks clogging the related drains.
- **SOLUTION**  
Lucart Professional NO CLOG handtowels quickly dissolve in the water, therefore avoiding the risk of creating clogging problems of plumbing pipes.
- **BENEFITS**
  - Elimination of clogging risks, due to the incorrect disposal of handtowels.
  - Elimination of maintenance costs and inconvenience caused by the removal of any blockages.
  - Customer satisfaction thanks to absorbent and pleasant feel of the handtowels.

# FATO

## The complete range of products for the table.

Fato is the Lucart signature of quality in the Ho.re.ca. sector.

A wide range of napkins, tablecloths, placemats, table runners and cutlery-holders which allow restaurateurs to furnish every venue in a practical and colourful way or alternatively in an elegant and stylish way.

The expertise of Fato along with the matching table prints are available for the client to personalize and therefore create a unique style for their own personal venues.

To discover the complete range of Fato products go to [www.fato.com](http://www.fato.com) or ask for a catalogue.

## ➤ AIRLAID

The Fato coordinates of airlaid are the response to the needs of quality and convenience in the restaurant world.

Products characterised by precious softness, similar to that of woven, which allow you to create an elegant and refined atmosphere in venues without the need to worry about creasing and washing.

▶ **TISSUE & CO**

A wide variation of patterns and a striking palette of colours makeup the unique Fato products and allow the restaurateur to arrange the design of the table and to best interpret their individual style and context of use.

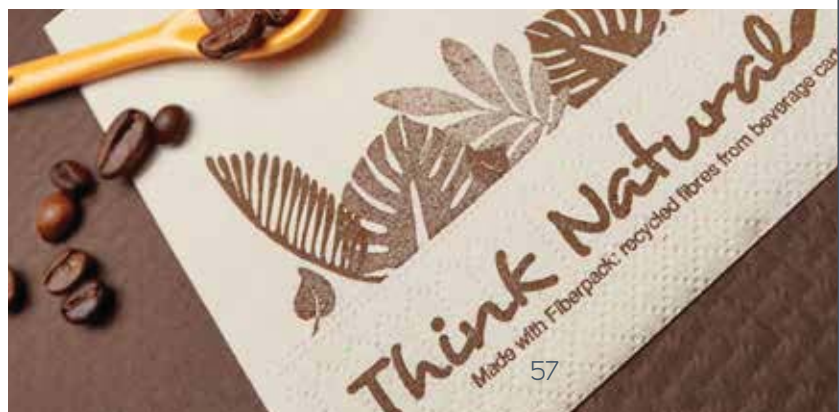

▶ **FATO NATURAL**

The solution for eco-trendy venues who want to be distinguished for respecting the environment, offering their customers not only an environmentally friendly product, but also a product which is aesthetically appealing. The light brown colour, typical of the colour of natural wood is minimal and elegant and works well with the decor of individual rooms.

Fato Natural is made in Fiberpack®, the raw material obtained recycling cellulose fibres present in beverage cartons.

For more information about Natural Project, see page 10.

## Hygiene serving the healthcare area.

Ideal products for healthcare area and wellness centres, which combine quality, comfort and practicality.

LUCART PROFESSIONAL  
Cod. 892247

Dispenser for medical sheets.

Medical sheets  
with bacteriostatic system.  
**BETTER HYGIENE.**

Hygiene is fundamental concern in medical centres and healthcare structures.

Lucart Group has therefore improved its own medical sheets with a **special bacteriostatic lotion**, preventing the growth and multiplication of germs.

The medical sheets are dermatologically tested.
